

## SLA Batteries Product Date Codes

The first five numeric characters represent the month, day and year of manufacture (MM/DD/Y)

- The first two numbers identify the month, from 01 to 12. For example, March is 03 and November is 11.
- The second two numbers specify the day of the month, from 01 to 31.
- The fifth digit identifies the year from 0 to 9. This digit is repeated every 10 years. For example, 1 = 2001, 4 = 2004 etc.

For example: 09016 would be broken down to September 1<sup>st</sup>, 2006

*There may be additional alpha-numeric characters at the end of the date code. These are internal lot numbers or injection mold numbers and they have no bearing on the date of manufacture.*

## Powersport Batteries Product Date Codes

The first four characters represent the year, month and production line (Y/MM/\*)

- The first letter identifies the year, from A to Z. For example, E = 2005, F = 2006, G = 2007.
- The second two numbers specify the month, from 01 to 12.
- The fourth digit/letter identifies the factory code. This code does not reflect the date of manufacture.

For example: F10Y would be broken down to October 2006.
